

SURYA K

SOFTWARE DEVELOPER

Tuticorin-628712 | +91 9597132239 | kaliappansurya47@gmail.com

LinkedIn: surya-kaliappan | GitHub: Surya-Kaliappan

PROFESSIONAL SUMMARY

Result-oriented Software Developer with a strong focus on building functional, cross-platform solutions. Experienced in full-stack integration, successfully connecting different aspect of interfaces through centralized APIs. specialized in rapid prototyping and adapting to new technology stacks to solve immediate business problems. Passionate about system logic and implementation.

PROJECT EXPERIENCE

Find Faculty

https://github.com/Surya-Kaliappan/Faculty_Finder.git

- Faculty Finder is a cross-platform application designed to help students to locate faculty members on campus (using respective time table data) by searching with name, department, or specialization. It features a user-friendly interface with searchable dropdowns, responsive design, and real-time data from a MySQL database. Built using React.js (Web), React Native (Mobile), and Java Swing (TimeTable Management), it streamlines the process of finding respective faculty without any confusion or delay with available data.

Chain of Custody

<https://github.com/Surya-Kaliappan/chainOfCustody.git>

- Implemented a tamper-proof evidence tracking platform using Hyperledger Fabric to enforce immutable data integrity and IPFS for decentralized storage of forensic media. Designed a secure "Digital Handshake" protocol that requires dual-party cryptographic approval for all custody transfers, eliminating unauthorized handling or falsification of records. Built a robust Node.js and MongoDB backend integrated with Socket.io to synchronize transaction states in real-time across a responsive React frontend. This solution replaces vulnerable manual logs with a transparent, audit-ready ledger, ensuring complete accountability from crime scene to courtroom.

Custom Terminal Shell | C++

<https://github.com/Surya-Kaliappan/shell-cpp.git>

- Developed a basic Linux-based terminal shell in C++ utilizing POSIX system calls for process management and I/O redirection. Implemented core shell functionalities including command parsing, execution of external binaries via fork() and execvp(), and a built-in history mechanism. Engineered advanced features such as auto-completion using Tab and persistent command history to enhance user experience.
-

RELEVANT EXPERIENCE

Web Developer | CYBERNERDS Club

July 2024 – March 2026

- Engineered a full-stack certificate automation tool (MERN Stack) to streamline administrative tasks for club events

Full Stack Web Developer Intern | Unified Mentor

July 2025 - September 2025

- Developed and maintained key features for dynamic web applications using the MERN stack (React.js, Node.js).
- Built and integrated RESTful APIs to manage data flow between the Back-end Server and MongoDB database.

Mobile App Developer Intern | Prodigy InfoTech

July 2025 – August 2025

- Designed and implemented responsive user interface components for a cross-platform mobile app using React Native. Assisted in debugging and testing application features to ensure stability and a smooth user experience.
-

USED TOOLS

- **Programming Languages:** Java, Python, JavaScript, C++
 - **Web & Databases:** Node.js, Express.js, React.js, MySQL, MongoDB, HTML/CSS
 - **Core Concepts:** OOPs Fundamentals, REST API Architecture, POSIX Fundamentals
 - **Tools:** Git/Github, Supabase, Firebase, MongoDB Atlas, Curl
-

EDUCATION

Bachelor of Technology. Computer Science Engineering

2022 - 2026

- Kalasalingam Academy of Research and Education, Anand Nagar, Krishnankoil, Tamil Nadu, India - 626126.
