PROFESSIONAL SUMMARY

Result-oriented Software Developer with a strong focus on building functional, cross-platform solutions. Experienced in full-stack integration, successfully connecting different aspect of interfaces through centralized APIs. specialized in rapid prototyping and adapting to new technology stacks to solve immediate business problems. Passionate about system logic and database connectivity

PROJECT EXPERIENCE

Find Faculty

- Faculty Finder is a cross-platform application designed to help students to locate faculty members on campus (using respective time table data) by searching with name, department, or specialization. It features a user-friendly interface with searchable dropdowns, responsive design, and real-time data from a MySQL database. Built using React.js (Web), React Native (Mobile), and Java Swing (TimeTable Management), it streamlines the process of finding respective faculty without any confusion or delay with available data.

Chain of Custody

- Implemented a tamper-proof evidence tracking platform using Hyperledger Fabric to enforce immutable data integrity and IPFS for decentralized storage of forensic media. Designed a secure "Digital Handshake" protocol that requires dual-party cryptographic approval for all custody transfers, eliminating unauthorized handling or falsification of records. Built a robust Node.js and MongoDB backend integrated with Socket.io to synchronize transaction states in real-time across a responsive React frontend. This solution replaces vulnerable manual logs with a transparent, audit-ready ledger, ensuring complete accountability from crime scene to courtroom.

Chat Room

- Implemented a basic server-client architecture in Python to understand real-time communication flow. Developed a simple chat interface with socket programming to handle message exchange. Integrated SSL/TLS to explore secure data transmission practices. Focused on learning core concepts of networking, concurrent connections, and encryption. Built with minimal dependencies to emphasize functionality and protocol understanding.
-

RELEVANT EXPERIENCE

Web Developer | CYBERNERDS Club

July 2024 – Present

- Engineered a full-stack certificate automation tool (MERN Stack) to streamline administrative tasks for club events

Full Stack Web Developer Intern | [Unified Mentor](#)

July 2025 - September 2025

- Developed and maintained key features for dynamic web applications using the MERN stack (React.js, Node.js).
- Built and integrated RESTful APIs to manage data flow between the Back-end Server and MongoDB database.

Mobile App Developer Intern | [Prodigy InfoTech](#)

July 2025 – Aug 2025

- Designed and implemented responsive user interface components for a cross-platform mobile app using React Native. Assisted in debugging and testing application features to ensure stability and a smooth user experience.
-

SKILLS

- Programming Languages:** Java, Python, JavaScript
 - Web & Databases:** Node.js, Express.js, React.js, MySQL, MongoDB, HTML/CSS
 - Core Concepts:** OOPs Fundamentals, REST API Architecture, Networking Basics (Sockets)
 - Tools:** Git/Github, Supabase, Firebase, MongoDB Atlas, Curl
-

EDUCATION

Bachelor of Technology. Computer Science Engineering

2022 - 2026

- Kalasalingam Academy of Research and Education, Anand Nagar, Krishnankoil, Tamil Nadu, India - 626126.
